

How many times have you thought of something really clever that would be a good bumper sticker, T-shirt or button? With a button machine, you have a great opportunity to finally put those clever ideas to good use immediately after the conception of your idea.

The need to be recognized

Every student has a need for positive recognition. This is especially true for students from the younger grades. A button machine will allow you to reward your students with a professional button for almost any positive behavior imaginable. You will be there to see the pride and appreciation on their faces. Remember, when a child goes home with an award button, it can be anticipated that further rewards will also be forthcoming at home.

HERE ARE A FEW IDEAS FOR DAILY, WEEKLY OR MONTHLY AWARDS:

Friendliest Student	Most Improved
Most Reliable	Most Helpful
Best Participation	Most Independent
Most Thoughtful	Best Citizen
Student of the Week	Neat Worker
Best Manners	Good Sport

“Recognizing every student”

Student Prints

Buttons & Machines

"We use photo buttons as a fund raiser for sports. We charge \$5 per button and we average selling four buttons per player."

Jerry Jones, Vocational Instructor
Fairview High School, TN

works than to let your students conceive an idea; produce, market and sell a product, then watch the profits roll in?

Assembly line production lessons

Our machines are easy to use for one, but by setting up an assembly line-type operation into several different tasks, professional looking quality buttons can be made easily and quickly (up to 250 per hour are possible with our Rotary Machine). Not only that, students can make buttons for fund-raisers, academic awards, athletics, etc. The possibilities are nearly limitless. In addition to a hands-on lesson about the efficiency of a division of labor, students can learn how to actually turn their creativity into dollars. For example, if you buy 1000 3-1/8 inch parts, your cost for each 3-piece part is about 20 cents per button. Some schools are selling photo buttons of athletes for \$5 a button. One for Mom, Dad, Grandpa and Grandma

ROTARY MACHINE

Learn business by doing business

Students learn about business by running one. You can provide your students with an excellent hands-on tool that can literally show them what it is like to run a business. What better way is there to demonstrate how a business

to wear to the next game. Factoring in the cost of your design, that's a profit of about \$4.50 per button.

Professional buttons a snap

All you need to do is supply the image. With the prevalence of quality computers and printers in every school, it has never been so easy to design the most attractive buttons inexpensively. Once your desired button design is printed out, simply use a circle cutter to cut the image (included with every machine) to the proper size, then use the button making components (front, back, mylar piece).

Not just for students

For a very modest investment, you can be operating your own button making business almost overnight. Just a little creativity and you are off and running.
